Date: July 28, 2016

To: Commissioners and Advisors

From: Jamie Ormond -
Advisor to Commissioner Catherine J.K. Sandoval

Subject: Discussion and Action on Proposed Appointment to the Low-Income Oversight Board

Public Utilities Code § 382.1 establishes a Low-Income Oversight Board (LIOB) to advise the Commission on low-income electric, gas, and water customer issues. The LIOB serves as a liaison between the Commission and the low-income ratepayers and representatives. The LIOB is comprised of eleven members. The positions are for two-year terms from the date of appointment by the Commission. Southern California Edison puts forth Mark Wallenrod as the new utility representative. He would replace Dan Rendler from Southern California Gas Company, who has completed his rotation.

Commissioner Sandoval recommends that during the August 18, 2016 business meeting, the Commission approve the appointment of Mr. Mark Wallenrod to the LIOB.

Mark Wallenrod is the Director of Demand Side Management (DSM) Programs at Southern California Edison Company (SCE). He manages one of the largest portfolios in the country with over 100 energy efficiency and demand response programs and an annual budget in excess of \$1 billion dollars. SCE's DSM programs serve 14 million customers and save over 1 billion kwh and 1300 Mw annually. Mark

also represents SCE on demand side management issues before regulatory authorities, state power agencies, and industry and trade groups.

Mark has more than 25 years of experience at SCE leading major regulatory and strategic initiatives, and developing and implementing DSM programs. He has previously worked for Regulatory Policy and Affairs, where he managed General Rate Case proceedings, and held positions in Customer Service as the manager of Business, Regulatory and Consumer Affairs, and manager of Tariff Programs and Services.

Prior to joining SCE, Mark was employed as an energy consultant for TRW Energy Engineering and as a consulting engineer for the power plant technical center of Davy McKee Corporation. Mark was also a research fellow for the Department of Energy at the National Renewable Energy Laboratory (NREL). Mark holds a Master of Science degree in Energy Management and Policy from the University of Pennsylvania, and is currently serving on the DSM Executive Council (E-Source) and boards of the National Association of Energy Service Companies (NAESCO) and Consortium of Energy Efficiency (CEE).

Mr. Wallenrod is highly qualified for the appointment and will be valuable addition to the LIOB.
